DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

An electrolyte comprising a) an alkyne compound containing R25, R26 and R27; W and Y6 and b1) an aromatic compound or b2) no aromatic compound.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner: Choose I or II or III.

I) An electrolyte comprising a) an alkyne compound containing R25, R26 and R27; W and Y6 and b) an aromatic compound cited in claim 16. (Please define R25,

R26, R27, W and Y6 from claim 13 and choose an aromatic compound from claim 16).

II) An electrolyte comprising a) an alkyne compound containing R25, R26 and R27; W and Y6 and b) an aromatic compound cited in claim 17. (Please define R25, R26, R27, W and Y6 from claim 13 and choose an aromatic compound from claim 17).

III) electrolyte comprising a) an alkyne compound containing R25, R26 and R27; W and Y6 and no aromatic compound.

The following claim(s) are generic: Claims 13-15.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The definitions of R25, R26 and R27 being a hydrogen atom, an alkyl group having 1-12 carbons, a cycloalkyl group having 3-6 carbons, an aryl group having 6-12 carbons or an aralkyl group having 7-12 carbons are structurally different. For W, a sulfinyl is very different than oxalyl. For Y6, an alkyl group having 1-12 carbons, an alkenyl group having 2-12 carbons, an alkynyl group having 2-12 carbons, a cycloalkyl group having 3-6 carbons, an aryl group having 6-12 carbons or an aralkyl group having 7-12 carbons are structurally different.

A telephone call was not made due to the complexity to request an oral election to the above election of species requirement, therefore did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
